## Detection coverage

## Lux on/off

Adopted dual PD technology, the sensor is able to differentiate artificial light brightness from natural light after installed inside the fixture, and automatically turn off light when ambient brightness exceeds preset lux level.

Preconditions to use the Lux-off function:

1. Standby period is  $+\infty$ ;
2. Standby dimming level is on 10%, 20% or 30%;
3. Daylight threshold is on 30Lux, 50Lux, 80Lux or 120Lux.

## Application---Lux on/off

Light automatically on when ambient brightness is lower than preset lux level.

With insufficient ambient brightness, light dims to 100% when motion detected

Light dims to standby level if no motion detected after holdtime

Light off when ambient lux level is higher than preset lux amount.

# Remote Control

\*The remote control is not provided by default, If you need, please contact sales.

**RC01**

Remote control for microwave type

**RC02**

Remote control for dimmable type

## Remote control RC01

• **ON/OFF**

\* Press the "ON/OFF" button, the light keeps permanently on or off.  
\* Press "Auto Mode", "RESET" or "Scene mode" buttons to quit from this mode.

• **Auto Mode**

\* Press "Auto Mode" button, the sensor starts to work and all settings remain the same before the light gets switched on/off.

• **Reset**

\* Press "RESET" button, products with DIP switch will be controlled by DIP switches.

• **Scene Mode**

Sc2	100%	5min	10Lux	10min	10%
Sc3	100%	10min	50Lux	30min	10%
Sc4	100%	30min	Disable	+∞	10%

• **Test**

\* The button "Test (2s)" is for testing purpose after commissioning. Pressing this button, the sensor goes to test mode (hold time is only 2s) automatically, stand-by period and daylight sensor are disabled.  
This mode can be ended by pressing "reset", "Auto mode", "scene mode" or "hold time".  
The sensor setting is changed accordingly.  
Brightness settings: Disable.  
Test mode can press any key to exit this mode.

 On/off control	There are 4 fixed scene modes program built-in the remote control to choose for different applications.
 Detection area	Press the button "detection range" to set detection range as 100% / 75% / 50% / 10%.

- \* Recommended installation of sensor suction ceiling height 3-6m;
- \* Wall mounting height suggested 1-1.8m;
- \* The remote controls the most remote distance 15 meters (in different places remote control distance will have the deviation).
- \* Weight (including battery): 56.5g.

### Remote control RC02

### Function:

- \* Wireless remote control, you can remotely control the light switch.
- \* Can control the lights of 4 groups of channels, each group is independent. Multiple lights can be set for each group.
